Professional Summary

Aspiring Software Engineer with strong expertise in Java, Data Structures Algorithms, Object-Oriented Programming, and System Design. Experienced in designing scalable backend systems, RESTful APIs, and full-stack applications using Java, React.js, PostgreSQL, and modern software engineering practices. Passionate about solving complex algorithmic problems, building reliable distributed systems, and developing high-quality software at scale.

Education

Dronacharya Group of Institutions (Affiliated to AKTU, Lucknow)	2027
<i>B.Tech in Computer Science and Engineering</i>	<i>CGPA: 8.27/10</i>
The Srijan School, New Delhi (CBSE)	2023
<i>Class XII</i>	<i>84.8%</i>
The Srijan School, New Delhi (CBSE)	2021
<i>Class X</i>	<i>88.8%</i>

Technical Skills

Languages: Java, SQL

Frameworks / Platforms: SpringBoot, Next.js, FastAPI

Databases: PostgreSQL, MongoDB, Firebase, SQLite

Version Control/ Devops Git, GitHub

Concepts: SDLC, Agile Development, OOPS Concepts, Unit Testing, Debugging, Problem Solving

Backend-as-a-Service (BaaS) Supabase, Firebase

Machine Learning: YOLOv8, OpenCV, scikit-learn

Architecture APIs: REST APIs, Microservices

System Design: Intermediate

Professional Skills

- Technical Communication
- Cross- functional Collaboration

Projects

Traffic AI – Smart Intersection Management System **2026** 🌐 Live
Python, YOLOv8, OpenCV, Machine Learning

- Developed an AI-powered full-stack traffic management system for real-time vehicle detection, classification, and congestion monitoring using Python, YOLOv8, and OpenCV.
- Designed efficient algorithms for emergency vehicle prioritization and adaptive signal management; applied unit testing, debugging, and performance optimization for reliability.

System Design Learning Platform **2026** 🌐 Live
React.js, TypeScript, Supabase, PostgreSQL, REST APIs, Vercel

- talking about the impact, the idea was to make people understand the system design concepts where they can visualize the movement of data and understand the bottlenecks
- Designed and developed a scalable full-stack application featuring structured learning paths, architecture case studies, coding challenges, and collaborative whiteboards, following Agile development practices and SDLC principles.
- Optimized PostgreSQL database interactions through Supabase, integrated persistent whiteboard storage using Excalidraw, and followed clean coding and unit testing best practices.
- Built production-ready REST APIs with API integration for live data and maintained full version control via Git throughout the development lifecycle.

Achievements

AIR 1180 UGC NET CSA (Phd) **Qualified**

- Demonstrated good understanding of Computer Science domain and teaching aptitude

GATE 2026 (Computer Science) **Qualified**

- Demonstrated strong proficiency in Data Structures, Algorithms, DBMS, Operating Systems, Computer Networks, and Software Engineering fundamentals.

Certifications

IBM Data Analysis with Python **2026** 🌐 Certificate

Supervised Machine Learning: Regression and Classification **2025** 🌐 Certificate

Coding Profiles

Solved more than 500+ questions on leetcode from trees, graph, arrays, linkedlist

Leadership & Extracurricular

Microsoft Learn Student Community, Dronacharya	2024 – Present
ML Co-Lead	
• Mentored 50+ students in ML fundamentals, GenAI tools, and practical AI application development through workshops and hands-on collaborative projects. • Coordinated technical sessions on Python, machine learning pipelines, and real-world problem solving, strengthening leadership, communication, and team collaboration skills.	
Research Paper	ICOTET 2024
Comparative Study of ML Algorithms in Detecting Multi-Organ Cancer and Classification	
Presented at the 2nd International Conference on Optimisation Techniques and Engineering Technology	
Indian Institute of Technology, Kanpur	August 2024
Training Program: 2-day offline workshop on Ethical Hacking and Cybersecurity	
Hackathons	
LNMIIT Jaipur Hackathon	Finalist (2026)
IDE Bootcamp	Finalist (2024)
